HAJDUSAGI IPARI MUVEK at TEGLAS

1. This is a new factory completed in 1953.

2. Location.

It is situated in a forest about 1 km. North West of TEGLAS railway station. TEGLAS is a village with about 3,000 inhabitants on the road and railway halfway between DEBRECEN and NYIREGYHAZA.

3. Production.

The factory manufactures ammunition for:

- (i) Automatic pistols
- (ii) Rifles
- (iii) Machine guns
- (iv) 23 mm. P.C. guns used in aircraft

This ammunition can also be used in Russian weapons. There is also one department which makes motor car parts for the car factory in CSEPEL.

4. Employees.

The maximum number of workers that can be employed is 20,000 and this number was reached in 1954. After 1954 it was considered that reserves of ammunition were adequate, employees were discharged and the number reduced to 5-600.

5. In 1956 the output of rifle ammunition had almost ceased.

6. The Director of the factory was, in October 1956, ^{*}VARGA, Geza. He was an officer of the A.V.H. Hungarian officers lived at the factory which was constantly visited by Russian officers.

7. Lay-out.

The factory consists of seven main workshops numbered 1 to 7. No. 7, however, was used for the manufacture of motor car parts. (A plan is attached.)

8. The explosive fillings for the ammunition are made elsewhere and brought to this factory.
